

business?

there is
just one
route

epyx is a business with one ultimate goal - to help you develop and implement the most effective solutions for evolving your business

The business world has now accepted that new technology can provide significant business benefits. The internet is an obvious example of this. Initially adopted as a tool for marketing and communication, it is now recognised as an enabling mechanism to transform the supply chain, bring about efficiencies and reduce costs.

putting the 'e'
in business

epyx provides new technology to the automotive industry, leveraging the considerable expertise of a team of people who have operated in the automotive software development environment and motor distribution sector for most of their lives.

The development personnel have been responsible for the production of key software solutions within the industry. Directors have all held senior automotive industry positions and are highly capable and proven business managers, with significant industry relationships. The technical team consists of senior development staff from the automotive software industry.

epyx views its team as its most valuable resource and by attracting individuals of the highest calibre it can provide its customers with the most effective e-business solutions available in the automotive sector today.

the solutions provided by epyx encompass adaptability, compatibility and scalability with a contemporary, multi-brand look and feel

e-trading Platforms

This area represents the main focus of the business. Specialist Internet technology is applied to provide key business advantages. With our focus on the automotive sector, our team's vast experience of building solutions for the automotive industry proves invaluable. Our key function is to provide solutions that retain operating margins yet reduce customer costs.

Development Services

epyx enters a consultative process with current and prospective clients alike to outline the brief, add definition through comprehensive understanding and create solutions which exceed expectations. Our expertise and knowledge is borne out of a wealth of automotive experience, and epyx only creates bespoke solutions for the automotive industry.

Vehicle Network

With the launch of 1link Vehicle Network, epyx redefined vehicle sourcing and purchasing. This 1link platform has attained the status of the preferred choice for the automotive industry; fundamentally it has become established as the de facto standard for vehicle procurement.

Service Network

This system provides the only credible answer to the fleet industry's need to automate the service, maintenance and repair discipline. This award-winning solution has quickly become the choice of the fleet industry and the UK's franchised networks and fast-fit operations alike.

Vehicle Relicensing

1link Vehicle Relicensing allows you to renew your Road Fund Licences electronically with the DVLA. Fully compatible with the DVLA's Graduated Vehicle Excise Duty rules, Vehicle Relicensing will deliver you massive savings in time and resource.

Hire Network

1link Hire Network is a comprehensive solution providing fleets with the ability to manage their complete relief vehicle hires and additional hire needs. This leading edge platform links rental purchasers with the supplying network to fulfil short term hire needs seamlessly and effortlessly.

Disposal Network

1link Disposal Network is designed to enable companies that operate a large number of vehicles to manage their entire "defleet" and remarketing requirements from initial contact with the driver through to the final sale of the vehicle.
